DETAILED ACTION

Election/Restrictions

1. Claims 1-8 are pending in the application.
2. Claims 1-8 contain embodiments directed to following patentably distinct species of the claims invention:
 - a. One embodiment drawn to a liquid crystal display device comprising a light blocking section for shading a defective orientation domain formed in the liquid crystal layer by an insufficiently rubbed portion around the protruding portion, wherein the light blocking section is formed in a downstream vicinity, and upstream vicinity of the protruding portion with respect to the rubbing direction, [fig. 4].
 - b. Another embodiment drawn to a liquid crystal display device comprising a portion of the light blocking section formed simultaneously with, and using the same material as the storage capacitor electrode section; and the remaining portion of the light blocking section formed simultaneously with, and using the same material as the line, wherein the line is for applying an electric potential to the transmissive and reflective electrode of the pixel, [fig. 9].

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, it appears that claim 1 is generic.

Art Unit: 2871

Applicant is advised that the reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent from or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
